Private sector

CIPF

"By improving reporting requirements for organisations, Integrated Reporting can bring additional information, in particular about the longer-term costs of climate change, to feed into markets and inform decision-making and policyformulation by institutions. If achieved, it will lead to better informed and more sustainable long-term investment, for the benefit of society"

Mark Carney, Chair, Financial Stability Board

Public Sector

"Public sector entities are one of the largest, if not the largest, reporting entities in the world, so the transparency of their financial information is of importance to us all. Integrated Reporting would enable governments and their stakeholders to gain a better understanding of resources available and help them to manage these more effectively."

Bertrand Badré, Managing Director and World Bank Group Chief Financial Officer

Getting to Square One, Greece and "a silly fixation"

May 28, 2015 4:24 pm

Tories wrong to buy votes with housing

It is not the job of the government to fulfil people's aspirations

"Only a silly fixation with public debt rather than the public sector's balance sheet masks the scale of the transfers."

performance in public services

The Notes from pages 35 to 64 form an integral part of these appual financial statements

Fiscal Management with a Balance Sheet Focus.....

 "achieving and maintaining levels of total net worth that provide a buffer against factors that may impact adversely on total net worth in the future" (Section 26G(1)(c));

Managing the Crown's Balance Sheet

Crown assets support the delivery of valuable public services.

The most recent forecasts show the Crown currently owns \$265 billion of assets (up from \$223 billion five years ago) and has \$185 billion of liabilities. The difference between these numbers represents the Crown's net worth (Figure 13).

Crown net worth is expected to continue to increase in line with the improving fiscal outlook, and the forecast reduction in net debt.

The Government's spending on new capital in the Budget since 2012 has been financed from the FIF. But new capital allowances in the Budget only make up a small component of total capital spending by the Crown. Over the next five years, forecasts show \$24 billion will be spent on capital across all parts of the Crown (Figure
